⚙️ React / Next.js

📄 TypeScript

⚙️ .NET Core & EF Core

🗄️ SQL Server

🧠 AI-Driven Dev

## PROFESSIONAL SUMMARY

AI-Forward Front-End Engineer with 3+ years delivering enterprise applications — from pixel-perfect React/Next.js frontends to robust .NET Core APIs and optimized SQL Server databases. Built and shipped 100+ features across HRM, ERP, and real-time Production Tracking systems at scale. Specialized in building scalable frontend architectures, reusable component systems, and high-performance UI experiences, designing EF Core data models, and writing complex SQL queries. Actively building AI-assisted workflows using Vercel AI SDK and OpenAI APIs. Implementing prompt-driven UI features and exploring LLM-powered user experiences. Leveraging AI tools like Cursor and Claude Desktop for rapid development, debugging, and architecture decisions.

## TECHNICAL SKILLS

|              |                                                                                |
|--------------|--------------------------------------------------------------------------------|
| Frontend ★   | React.js · Next.js · TypeScript · JavaScript (ES2022+) · Vue.js · HTML5 · CSS3 |
| State & Data | Redux Toolkit · Zustand · React Query · SWR · Context API                      |
| Styling      | Tailwind CSS · MUI / Ant Design · Bootstrap · Figma → code                     |
| Backend ★    | .NET Core (Clean Architecture) · Entity Framework Core · Node.js · REST APIs   |
| Database ★   | SQL Server (schema design, query & index optimization) · MySQL                 |
| AI / Dev     | Vercel AI SDK · OpenAI API · Claude Desktop · Cursor · ChatGPT                 |
| Tooling      | Git & GitHub · Cypress · Postman · Figma                                       |

## EXPERIENCE

### Software Engineer

#### Ha-Meem Group

Oct 2024 – Present  
Tejgaon, Dhaka

Portal 360 — enterprise HR & Admin suite · React.js · Next.js · TypeScript · .NET Core · SQL Server

- ▶ Architected and delivered 100+ features across HRM, Recruitment, KPI, ESS, and Production Tracking as lead full-stack engineer.
- ▶ Built Organogram system with hierarchical drag-and-drop UI in React/TypeScript and EF Core-backed hierarchy APIs.
- ▶ Built reusable frontend components and scalable UI architectures across multiple modules.
- ▶ Optimized rendering performance using memoization, lazy loading, and efficient state management
- ▶ Designed Recruitment module end-to-end: React multi-step forms, Redux state, .NET Core approval workflow APIs, and SQL Server schema.
- ▶ **30% faster dashboard load time** — optimized React Query caching, lazy loading, and EF Core LINQ queries with SQL Server index tuning.
- ▶ Delivered Product Tracking System (PTS) with Vue.js dashboards, QR-code tagging, real-time analytics, and .NET Core + SQL Server backend.
- ▶ Converted 50+ Figma screens to pixel-perfect, fully responsive interfaces using Tailwind CSS and Ant Design.
- ▶ Integrated AI-assisted development workflows using Cursor and Claude to accelerate development, debugging, and architecture decisions; actively building AI features using Vercel AI SDK and OpenAI APIs.
- ▶ Implemented unit and E2E testing using Jest and Cypress

## Junior Software Engineer

### Fort International Ltd

Nov 2022 – Oct 2024  
Elephant Road, Dhaka

*EnterCount Accounting ERP (React · Node.js · .NET Core) · Pulse360 Hospital Management (Laravel · jQuery)*

- ▶ Built POS system frontend with React + Redux and REST API backend in .NET Core + EF Core — improved transaction speed by 20%.
- ▶ Designed and optimised SQL Server schemas for accounting, inventory, and billing modules; wrote complex stored procedures and LINQ queries.
- ▶ Enhanced invoice accuracy by 15% through frontend validation and automated .NET Core backend workflows.
- ▶ Revamped patient admission/discharge workflows in Pulse360 (Laravel + jQuery) — cut processing time by 25%.
- ▶ Integrated Firebase for real-time product and transaction tracking across the ERP frontend.
- ▶ Built SEO-optimised landing pages with Next.js following Core Web Vitals and performance best practices.

## KEY PROJECTS

### Portal 360 – HR & Admin Suite

[portal.hameemgroup.com](https://portal.hameemgroup.com)

*Enterprise HRM platform — Recruitment, ESS, PMS, KPI, and Organogram modules.*

- ▶ React.js + TypeScript frontend; Redux state management; role-based access and real-time KPI routing.
- ▶ .NET Core (Clean Architecture) APIs + EF Core; SQL Server with optimised indexes for complex HR reporting.
- ▶ 30% dashboard load time reduction through React Query caching and EF Core query tuning.

### Ha-Meem Career Portal

[jobs.hameemgroup.com](https://jobs.hameemgroup.com)

*End-to-end recruitment portal for Ha-Meem Group — job listings, applications, and candidate tracking.*

- ▶ Built with Next.js (App Router) + TypeScript frontend; multi-step application forms with file upload and real-time status tracking.
- ▶ .NET Core REST APIs with role-based access control; SQL Server schema for applicant, job, and interview data.
- ▶ Categorized job listings (HR, IT, Finance, Operations, and more) with automated email notifications at each application stage.

### Product Tracking System (PTS)

[pts.hameemgroup.com](https://pts.hameemgroup.com)

*Real-time garment tracking — cutting to final QC — powered by QR codes.*

- ▶ Vue.js dashboards for cutting, sewing, and finishing lines with live KPIs and garment history.
- ▶ .NET Core + EF Core backend; SQL Server optimised for real-time factory-floor analytics.
- ▶ QR-code generation, bundle tagging, and rack/bin management in one unified workflow.

### EnterCount Accounting ERP

[entercount.com](https://entercount.com)

*Full-featured ERP for accounting, inventory, and billing.*

- ▶ Full-stack: React + Redux frontend · .NET Core + EF Core APIs · SQL Server database.
- ▶ POS system — 20% faster transactions; automated invoicing — 15% accuracy improvement.
- ▶ Firebase real-time integration for product and transaction tracking.

## EDUCATION

### BSc in Computer Science & Engineering

Bangladesh University of Business and Technology

CGPA 3.32 / 4.0 · 2022 – 2025

### Diploma in Computer Technology

Magura Polytechnic Institute

GPA 3.46 / 4.0 · 2016 – 2021
